I feel more confident about my knowledge of the topic.	86%
I learned more about practical strategies that I can use.	84%
As a result of this webinar, my knowledge/skills have increased.	88%
The training will have a positive impact on my professional work.	88%

HOW will you use the information you learned?

Participants overall mentioned they learned:

- How to support children and families directly in sessions, by sharing resources with colleagues, and in better understanding disciplines like Speech Language Pathology and speech therapy.
- Specific strategies and resources.
- More about echolalia, gestalt language processing, and language acquisition generally.

I'd previously thought of language processors as being singularly one or the other, but this webinar has helped me open up my way of thinking to better understand that people can have multiple avenues to process language.

This information has really given me some better background on the language that I see the kids I work with use + how to better respond/support echolalia.
